

Plastic Packaging for Food Products

Artekno Food Packaging – Always at Your Service

The manufacture of plastic food packaging is one of our core businesses. We offer a wide range of even small batches of plastic packaging with a short delivery time.

Artekno Eesti OÜ is a part of private owned Finnish Artekno Saarioinen group. Saarioinen Oy is a leading manufacturer of ready foods in Finland and Artekno Oy is centered in manufacturing products from plastic materials by different methods.

Artekno Eesti OÜ was established in year 2009. In 2010 Estonian company Polyform AS was bought by Artekno Eesti OÜ.

The aim for Artekno Eesti OÜ is to produce food packagings for food industry from recyclable materials: Polystyrene (PS), Polypropylene (PP) and Polyethylene Terephthalate (A-PET).

We develop our company together with our 70 employees, and deliver packagings in more than 10 European countries.

We are proud of having two different production methods, thermoforming and injection molding. With these methods, including flexo printing, we can meet the customer requirements in all packaging needs.

Our injection molding department has started with IML technique since 2012. This is a very important step for Artekno Eesti OÜ in the injection molding product development.

Symbol	Name	Temp. °C	
 PETE	APET (Amorphous Polyethylene Terephthalate)	-40°C to +70°C	
 PP	PP (Polypropylene)	-40°C to +120°C	microwave safe
 PS	PS (Polystyrene)	-40°C to +85°C	

Temperatures can deviate depending on the raw material content that is used.

Our food packaging products are manufactured in full compliance with the industry standards and certifications.

Injection Molding Products

Colours: transparent, black and white are standard colours. Other colours are also possible by agreement.
Printing: IML printing technology, flexo.

Artekno

- Accuracy Since 1953

Artekno Oy was founded in 1953. For decades, the company has been growing into a recognised manufacturer and importer that serves the food, packaging and manufacturing industries as well as private final consumers. The portfolio of Artekno Oy ranges from food packaging and packaging components to various technical reinforced plastic and polyurethane products. In addition to design and production, the total service covers an extensive network of sub-contracting support. We take care of our customer throughout the product lifecycle.

Artekno Oy is not only stable, but it is also a dynamic company. Bold product development through financial resources, new products and innovative design are an integral part of the company's operations. Our success is based on a flexible, customer-orientated operation and advanced expertise. Extensive experience, reliability and high product quality are what our customers appreciate.

Artekno Eesti OÜ is a subsidiary of Artekno Oy.
